

## **[HP HP0-J33](#)**

**Exam Name:** *Implementing HP StorageWorks EVA Solutions*

**Q & A :** 65 Q&As

***Pdf Demo***

### **Quality and Value for the HP0-J33 Exam**

[Exam4Dumps Practice test](#) for HP HP MASE HP0-J33 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development. our products of the latest HP0-J33 exam dumps, HP0-J33 questions and answers is the real HP0-J33 practice test.

[HP MASE Certification](#) HP0-J33 Q&A are created by senior IT lecturers in exam4dumps certification Q&A network and HP MASE product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real **HP0-J33 practice test** and with all the correct answer. we promise the HP0-J33 Q&A for HP MASE HP0-J33 (Implementing HP StorageWorks EVA Solutions) examination of original title complete coverage. HP0-J33 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

exam4dumps professional provide HP MASE HP0-J33 the newest Q&A, completely covers HP0-J33 test original topic. With our complete HP MASE braindumps resources, you will minimize your HP MASE cost and be ready to pass your HP0-J33 tests on Your First Try, 100% Money Back Guarantee included!

### **100% Guarantee to Pass Your HP0-J33 Exam**

If you do not pass the HP MASE HP0-J33 exam on your first attempt using our Exam4Dumps **HP0-J33 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

### **Downloadable, Interactive HP0-J33 Testing engines and PDF Version**

Our Braindumps Preparation Material provides you everything you will need to take a [HP MASE certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

**Free HP0-J33 Exams:**

***This is demo only, this pdf do not include the questions and answers pictures***

1. What is the source of the identifying data that is inserted into the HP CommandView EVA SNMP MIB when it is generated?

- A. SMI-S agent on management host
- B. hardware ASIC in the first host port that sends the event
- C. default parse file
- D. controller software-specific parse file

Answer: D

2. Which EVA virtualization features help reduce customer Total Cost of Ownership? (Select two.)

- A. load customization
- B. LUN definition ruleset
- C. pre-set VRAID security
- D. reduced stranded capacity
- E. significantly increased utilization

Answer: DE

3. You create a Vraid0 LUN in an EVA with 16 disks consisting of two 8-disk RSS sets. What will happen if a single disk fails?

- A. The LUN will fail even with an RSS configured.
- B. The LUN will continue to operate normally due to the redundancy provided by the RSS sets.
- C. The LUN cannot be configured across two RSS sets.
- D. The LUN will continue to operate at reduced performance while the RSS sets rebuild the lost data.

Answer: A

4. What happens when you set the failure protection level for a disk group with same-sized disks on an EVA to single?

- A. Two disks are reserved as spare space.
- B. A one-disk equivalent is reserved as spare space.
- C. One disk is reserved as spare space.
- D. A two-disk equivalent is reserved as spare space.

Answer: D

5. A disk group is set to double protection level and contains only Vraid1 virtual disks. What happens when there is simultaneous loss of two physical disks from different mirrored pairs within the same Redundant Storage Set?

- A. The Vraid1 fails and there is data loss.
- B. Vraid1 data migrate to Vraid5.
- C. The Vraid1 virtual disk stays in degraded mode and data is preserved.
- D. The Vraid1 data from the failed disks is reconstructed.

Answer: D

6. Which feature is unique to the EVA8400 / 11GB cache (per controller) model when compared to other EVA array models?

- A. use of a third cache battery
- B. 400TB addressable storage space
- C. up to 5GB policy memory
- D. maximum of 27 device shelves

Answer: A

7. Which interface is used to connect a FATA drive to an EVA controller? (Select two.)

- A. single port
- B. dual port
- C. Serial ATA
- D. Native Fibre Channel
- E. Parallel ATA

Answer: BD

8. Which interconnect technology is used when integrating the mpx110 router into an EVA solution?

- A. FCIP
- B. FICON
- C. iSCSI
- D. WDM

Answer: A

9. How does releveling occur after the loss of one disk in a 16-member group containing ten 10GB Vraid1 Vdisks?

- A. The group does not need to relevel.
- B. across 16 disks in the group
- C. across 15 disks in the group
- D. across 14 disks in the group
- E. across 10 disks in the group

Answer: D

10. What is a physical segment (PSEG) in the EVA context?

- A. smallest virtual disk space allocated on a disk drive
- B. smallest physical disk space allocated on a disk drive
- C. disk space containing information about the selected redundancy level of the virtual disk
- D. data portion read from or written to a physical disk before the next physical disk is accessed

Answer: B
