

[HP HP0-J36](#)

Exam Name: *Designing and Implementing HP LeftHand SAN Solutions*

Q & A : 65 Q&As

Pdf Demo

Quality and Value for the HP0-J36 Exam

[Exam4Dumps Practice test](#) for HP HP CSE HP0-J36 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development. our products of the latest HP0-J36 exam dumps, HP0-J36 questions and answers is the real HP0-J36 practice test.

[HP CSE Certification](#) HP0-J36 Q&A are created by senior IT lecturers in exam4dumps certification Q&A network and HP CSE product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real **HP0-J36 practice test** and with all the correct answer. we promise the HP0-J36 Q&A for HP CSE HP0-J36 (Designing and Implementing HP LeftHand SAN Solutions) examination of original title complete coverage. HP0-J36 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

exam4dumps professional provide HP CSE HP0-J36 the newest Q&A, completely covers HP0-J36 test original topic. With our complete HP CSE braindumps resources, you will minimize your HP CSE cost and be ready to pass your HP0-J36 tests on Your First Try, 100% Money Back Guarantee included!

100% Guarantee to Pass Your HP0-J36 Exam

If you do not pass the HP CSE HP0-J36 exam on your first attempt using our Exam4Dumps **HP0-J36 testing engine and pdf study guide**, we will give you a FULL REFUND of your purchasing fee.

Downloadable, Interactive HP0-J36 Testing engines and PDF Version

Our Braindumps Preparation Material provides you everything you will need to take a [HP CSE certification](#) examination. Details are researched and produced by [HP Certification](#) Experts who are constantly using industry experience to produce precise, and logical.

Free HP0-J36 Exams:

This is demo only, this pdf do not include the questions and answers pictures

1. Which statement is true about the iSCSI initiator?
- A. The iSCSI initiator is only active during read operations.
 - B. The iSCSI initiator represents the LUNs.
 - C. The iSCSI initiator resides on the host and connects to the targets.
 - D. The iSCSI initiator is a software package running on the host.

Answer: C

2. Which statements about remote copy are correct? (Select two.)
- A. Remote copy is always thin provisioned.
 - B. Remote copy can be synchronous and asynchronous.
 - C. Remote copy is an asynchronous replication of a volume.
 - D. Remote copies cannot be mounted.
 - E. Remote copy is asynchronous replication between different clusters only.

Answer: AC

3. Which statement about Virtual IP Load Balancing (VIPLB) is correct?
- A. VIPLB is part of the Windows Solution pack.
 - B. VIPLB is a software driver installed on the host.
 - C. VIPLB replaces the iSCSI redirect function.
 - D. VIPLB directs iSCSI communication to the least busy storage node in the cluster.

Answer: D

4. Which statements about HP LeftHand SAN replication levels are correct? (Select three.)
- A. Copies are located on different clusters.
 - B. Redundant copies of blocks reside on different storage nodes.
 - C. Performance improves as the number of copies increases.
 - D. Up to four copies can be created.
 - E. The replication level is defined per storage node.
 - F. The replication level cannot exceed the number of storage nodes in the cluster.

Answer: BDF

5. for what are IP SANs best suited? (Select three.)
- A. applications requiring minimum latency
 - B. environments that require Fibre Channel infrastructure
 - C. high availability environments
 - D. geographic disaster recovery
 - E. environments with existing Ethernet infrastructure
 - F. non-shared storage implementation

Answer: CDE

6. What are typical examples of snapshot utilization? (Select three.)
- A. replacement for traditional backups
 - B. protection against disk failures
 - C. protection against multiple hardware failures
 - D. protection against manual data deletion
 - E. file level restore without tape or backup software
 - F. source volumes for backup creation

Answer: DEF

7. Which types of host bus adapters (HBA) can be used for the iSCSI protocol? (Select two.)
- A. SW iSCSI initiator without a NIC (network interface card)
 - B. iSCSI HBA with TCP offload engine (TOE)
 - C. Fibre Channel HBA
 - D. NIC with SW iSCSI initiator
 - E. iSCSI HBA with TCP TOE SW iSCSI initiator

Answer: BD

8. Where is RAID configured in HP LeftHand SAN solutions?
- A. at the volume level

- B. at the storage node level
- C. at the cluster level
- D. at the management group level

Answer: B

9. Which statements about iSCSI are correct? (Select two.)

- A. iSCSI does not offer any security features.
- B. iSCSI installation is less complex than Fibre Channel installation.
- C. iSCSI is only supported by Microsoft Windows operating systems.
- D. iSCSI is available for the most common OS platforms.
- E. iSCSI is a parallel data protocol.

Answer: BD

10. Which statement about volumes is correct? (Select three.)

- A. Volumes can be part of different clusters.
- B. Each volume belongs to a single cluster.
- C. For database applications, different volumes should be used for database files and log files.
- D. Volumes in the same cluster must have the same replication level.
- E. Volumes can be migrated to different clusters within the same management group.
- F. Additional volumes require additional storage nodes in the cluster.

Answer: BCE
